ABOUT

AI & Data Science undergraduate with experience building AI-powered applications using Python, FastAPI, Whisper, and LLM APIs. Worked on voice-based AI assistants, multilingual NLP systems, and retrieval-based applications. IEEE-published author at ICISS 2026. Interested in AI Engineering, NLP, and Generative AI roles.

EDUCATION

M Kumarasamy College of Engineering
B.tech. Artificial Intelligence and Data Science
Velammal Matric. Hr. Sec. School, Theni
Computer Science and Mathematics

Aug 2022 – Mar 2026
CGPA: 7.25 (Scale: 10)
June 2022
Percentage: 70%

SKILLS

Programming & Databases: Python, SQL, MySQL

Backend & APIs : Flask, REST APIs, CRUD Operations, API Integration

AI & Applied Systems: Retrieval-Augmented Generation , Speech-to-Text, LLM-based Application Development

Data & Database Handling: pandas, NumPy, SQL Queries, Joins, Database Schema Design

Tools: Git, GitHub, Xampp

EXPERIENCE

Database Administrator Intern

Jul 2024 – Mar 2026

IMET Tooling India Pvt Ltd, Coimbatore

- Designed and managed MySQL database schemas for a B2B bulk order management system, ensuring data integrity and performance
- Developed and optimized SQL queries and supported backend operations in a XAMPP-based environment
- Collaborated with cross-functional teams, contributing to system integration, testing, and debugging

PUBLICATIONS

AI-Driven and NLP-Powered Multilingual Tutor for Indian Languages

Mar 4-6 2026

Vaishnavi J., Prasanth K. R., **Nithish Kumar R.**, Pragadheesh M., Hareesh K. | *8th International Conference on Intelligent Sustainable Systems (ICISS 2026)*, IEEE-affiliated | Paper ID: ICISS-0103 | [Accepted](#)

PROJECTS

AI Personal Assistant System | Python, Whisper, Ollama, Notion API

- Built a voice-enabled AI assistant that converts spoken input into structured memory entries using Whisper
- Integrated Notion database for storing and managing user memories, tasks, and daily activity records
- Implemented retrieval-based memory access to fetch previous entries and generate automated diary summaries
- Developed modular Python workflows for speech processing, memory storage, and response generation

Daily Diary Web Application | Python, Flask, MySQL

- Developed an automated diary generation system that converts stored user memories into readable daily summaries
- Retrieved information from stored entries to generate personalized diary content using LLM-based text generation
- Structured and organized diary records through Notion database integration for persistent storage and retrieval

Regional Language NLP Learning Platform | Python, Flask, APIs

- Built a platform to fetch and deliver learning content using APIs
- Applied translation and summarization for regional language accessibility
- Enabled text-based interaction for improved usability

CERTIFICATION

IBM AI Developer Professional Certificate | IBM (Coursera)

Nov 2024

Comprehensive program covering AI fundamentals, generative AI, prompt engineering, and AI application development using Python, Flask, and web technologies
